```
1 (; This is a comment. ;)  
2  
3 (; This is a  
4 multi-lined comment. ;)
```

## 1.1 Fonts and Styles:

- hello world
- world world
- hello world
- HELLO WORLD
- $\Theta(n)$

## 1.2 Enum List Style:

- (a) One
- (b) Two
- (c) Three

## 1.3 A basic Table:

hello	world
-------	-------

## 1.4 Figure

Basic single figure (commented out):

Code environment:

```
int main() {  
    cout << "Hello World" << endl;  
}
```

One way to put code side-by-side:

```
<animal.h>= // C++  
class Animal {  
    ...  
};
```

```
<animal.cpp>= // C++  
...
```

One way to align multiple (2) figures in a row:
